Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 43,44 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-37 of U.S. Patent No. 6,363,281. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the present application are a mere obvious broadening of the claims of the parent patent.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 43,44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sloman '416.

Art Unit: 3762

Sloman is considered to render obvious all of the subject matter of the above claims. As shown in figure 1, the Sloman device includes pulse generators 16 and 22 connected to electrodes 18 and 20, as well as amplifiers 26 and 28. The device of Sloman senses for atrial capture by sensing for a far field R wave at the atrial electrode. If the sensed signal meets certain template features, atrial capture is considered to have been achieved. Further, to use a switch to connect at least one of the electrodes to the sense amplifier is considered to have been obvious since the electrodes are connected to both pulse generators and amplifiers and therefore need to be switched from one to the other depending on whether stimulation or sensing is performed with the electrodes.

Allowable Subject Matter

5. Claims 38-42, 48-61 are allowed.
6. Claims 45-47 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
